Sec. 7, Sheaf of Barley, any other variety—1st D. Peck 2nd John Othen.
Sec. 8, Sheaf of spring Rye—1st A. J. Pratt 2nd W. H. Burrows.
Sec. 9, Sheaf of Flax—1st Ed. Bakke 2nd W. H. Burrows.
Sec. 10, Sheaf of Sunflowers—1st G. Rempel 2nd A. J. Pratt.
Sec. 11, Sheaf of fodder Corn—1st J. Othen 2nd E. Bray.
Sec. 12, Sheaf of Bromo Grass—1st Fred Hatch 2nd E. Hatch.
Sec. 13, Sheaf of Alfalfa—1st R. Moore 2nd E. Bray.
Sec. 14, Sheaf of Rye Grass—1st E. Bray.
Sec. 15, Sheaf of Timothy—1st E. Bray 2nd W. H. Burrows.
Sec. 16, Sheaf of sweet Clover—1st Ed. Bakke 2nd W. Caskey.
Sec. 18, Sheaf of Millet—1st E. Bray.
Sec. 19, Sheaf of fall Rye—1st Fred Hatch 2nd A. J. Pratt.
Sec. 20, Best collection of Grains and Grasses, at least 5 varieties—1st E. Bray 2nd R. Marsden.

Roots and Vegetables Class 29

- Sec. 1, Beets, bunch of six—1st W. Caskey 2nd Mrs. F. W. Belliveau.
Sec. 2, Carrots, bunch of six, short—1st A. J. Pratt 2nd Mrs. J. Nicholson.
Sec. 3, Turnips, six, early—1st Mrs. S. Davis 2nd E. Bray.
Sec. 4, Turnips, six, late—1st Mrs. S. Davis 2nd E. Bray.
Sec. 5, Potatoes, half bushel—1st J. Othen.
Sec. 6, Cabbage, 2 heads—1st G. Rempel 2nd F. Thompson.
Sec. 9, Onions, any class—Mrs. J. Sanders 2nd Mrs. E. Bray.
Sec. 10, Onions, dutch sets—A. J. Pratt 2nd Mrs. T. McBrien.
Sec. 11, Parsley, two bunches—1st R. A. Cornell 2nd Mrs. E. Bray.
Sec. 12, Parsnips, bunch of six—1st A. J. Pratt 2nd R. A. Cornell.
Sec. 13, Rhubarb, one bunch—1st Mrs. J. R. Anderson 2nd J. Othen.
Sec. 15, Tomatoes, plate of six—1st Mrs. J. R. Sanders.
Sec. 16, Celery, 2 bunches—1st E. Bray.
Sec. 20, Peas, pod, 1 quart—1st Mrs. T. McBrien 2nd Mrs. Gus Schmidt.
Sec. 21, Mushrooms, 6 roots—1st J. Othen 2nd E. Bray.
Sec. 25, Sugar beets, 6 roots—1st E. Bray.
Sec. 26, Carrots, long—1st J. Othen 2nd F. Thompson.
Sec. 27, Radish, winter—1st E. Bray 2nd J. Othen.
Sec. 28, Radish, any variety—1st Mrs. W. A. Bishop 2nd A. J. Pratt.
Sec. 29, Lettuce, 3 heads—1st R. A. Cornell 2nd F. Thompson.

- Sec. 31, Vegetable marrow, 2 fruits—1st R. A. Cornell.
Sec. 32, Best collection of Vegetables, at least six varieties—1st Mrs. Gus Schmidt, R. Marsden.

Dairy Produce Class 30

- Sec. 1, Butter, fancy shapes, table use—1st E. H. Church 2nd J. Sanders.
Sec. 2, Butter, roll or print—1st E. H. Church 2nd J. Sanders.
Sec. 3, Butter, crock—1st D. McKay 2nd E. H. Church.
Sec. 4, Dozen eggs, white—1st D. McKay 2nd W. A. Bishop.
Sec. 5, Dozen eggs, brown—1st J. Nicholson 2nd W. H. Burrows.
Sec. 6, Home-made cheese—1st J. Broden 2nd D. McKay.

Domestic Produce Class 31

- Sec. 3, Home-cured ham, smoked—1st D. Warwick 2nd R. Marsden.
Sec. 4, Home-cured bacon, smoked—1st D. Warwick.
Sec. 5, Home-cured lard—1st Alf. Gibson 2nd Miss T. Dick.
Sec. 6, Home-made Soap—1st E. H. Church.

Canned Fruits and Vegetables Class 32

- Sec. 1, Collection of canned Vegetables—1st M. G. Whitlock.
Sec. 4, Collection of canned Fruit—1st H. C. Johnson 2nd J. Sanders.
Sec. 5, Collection of Jellies—1st M. G. Whitlock 2nd J. Sanders.
Sec. 6, Canned meat, beef—1st A. J. Pratt 2nd H. Johnson.
Sec. 7, Canned meat, chicken—1st C. G. Peterson 2nd H. C. Johnson.

Native Grown Fresh Fruits Class 33

- Sec. 1, Black currants—1st R. McLaren 2nd W. Burrows.
Sec. 2, Red currants—1st F. Thompson 2nd J. Sanders.
Sec. 3, Raspberries—1st Ed. Bray 2nd S. Davis.
Sec. 5, Gooseberries—1st Ed. Bray 2nd J. Sanders.
Sec. 6, Collection, 3 varieties—1st J. Sanders 2nd Ed. Bray.

Plants Class 34

- Sec. 1, Collection of house plants—1st H. C. Johnson 2nd M. G. Whitlock.
Sec. 2, Collection of cut flowers—1st M. G. Whitlock 2nd M. Culp.

Baking and Cooking Class 35

- Sec. 1, Loaf of home made bread, white—1st S. Martin 2nd Wm. A. Walker.
Sec. 2, Loaf of home-made bread, brown, plain—1st E. H. Church 2nd A. Youell.
Sec. 3, Nut loaf—1st Alf. Gibson 2nd D. McKay.
Sec. 4, Fancy shape loaf—1st J. Broden.
Sec. 6, Tea biscuits 6—1st W. T. A. Walker 2nd J. Sanders.
Sec. 7, Apple pie—1st H. C. Johnson 2nd J. Nicholson.
Sec. 8, Lemon pie—1st C. L. Dunford 2nd D. McKay.
Sec. 9, Raisin pie—1st T. M. Wardell 2nd M. B. Stuart.
Sec. 10, Pumpkin pie—1st J. Nicholson 2nd F. J. Belliveau.
Sec. 11, Buttercrunch pie—1st J. Gripp 2nd C. L. Dunford.
Sec. 12, Tart pie—1st F. J. Belliveau 2nd Alf. Gibson.

Empire Games at Hamilton

Hamilton, Ontario, will be the centre next month of the British Empire Games to which athletes from all the Dominions and the Mother Country will flock. F. W. Beatty, chairman and president of the Canadian Olympic Association, is chairman of the national committee of the A. A. U. of Canada for the Games, and promises of support have been received by the committee from Australia, New Zealand, Africa, British Gren-

Colony, the Irish Free State, Northern Ireland, while a strong and representative British committee has been formed to ensure full British participation at this notable sports gathering of the British peoples. Canada will, of course, be very fully represented, practically every province sending its outstanding athletes. The Games are scheduled to be held August 16-22.

It is not much to pay for guaranteed finest quality

'Fresh from the gardens'

Cause Of Our Economic Ills

Anything and everything that will have even the slightest effect in removing causes of friction between nations on the one hand, or of promoting goodwill on the other hand, should to an ever increasing degree receive the support of every government, every organization, every individual. There is danger as we get farther and farther away from the agency of the war years, 1914-1918, and as the horrors of that grim struggle begin to fade and become indistinct in our memories, to forget just how awful war really is.

It is, well, therefore, to be occasionally reminded of what the War continues to mean to us today, twelve years after it passed into history. Hon. Philip Snowden, British Chancellor of the Exchequer, whose outstanding characteristics in his public speeches is his clear incisiveness, unswayed by hysteria or undue sentiment, gave a radio talk recently in which he pleaded for world peace, and for the putting forth of every effort to attain that object.

Despite Mr. Snowden's well known pacific tendencies, he dealt only with the mere dollars and cents aspect of war as an agent of destruction. Taking the case of Great Britain, he pointed out that it had spent some 50,000 million dollars on its part in the Great War. This was apart from the loss of the war-producing capacity of millions of men drawn for four years from useful employment, and of course took no cognizance of the loss of life.

The war, as Mr. Snowden pointed out, left Great Britain with a debt of over thirty-five billions of dollars, the interest on which alone costs one and three-quarter billions a year. It all has to come out of taxation.

At the present rate of payment, Mr. Snowden added, it will take 140 years to wipe it out. Today the British people are raising \$5,000,000 every day, \$200,000 every hour, \$3,000 every minute for debt purposes. It takes the whole-time labour of 2,000,000 workers year in and year out to pay the annual cost of the nation's debt.

Such stupendous figures throw Mr. Snowden's main point into bold relief. "It passes the power of the most imaginative mind," he said, "to conceive what prosperity and happiness could be added to the world if the resources wasted by war would have been used for the advancement of human health." But even the least imaginative mind must realize from the figures that now is the time for all good men and women the world over to ponder the folly of preparing for another war.

The great economic ills from which the world is suffering today—and from which Canada unfortunately is not free—could all be overcome if the huge amounts raised by taxation to pay war debts could be diverted into constructive channels, not to mention what might have been done to the enormous principal sum expended during the war itself being devoted to improving world conditions in all countries.

If the money spent waging war, by Britain alone, had, instead, been devoted to great constructive national programmes, there would have been no unemployment, no poverty, no suffering, no crime, no disease during the past twelve years, and everybody would be hard at work now. The standard of living in Britain would have been raised; housing and all social amenities would be on a higher plane than at present.

And what would have been true of Great Britain would be equally true of all countries. Canada included. It is easy to thoughtlessly lay the blame for unemployment, poverty, suffering, crime, disease, and all the sundry other ills to this cause and that cause, and to lay the blame here or there, but the basic cause is the war, and the huge burden it has imposed on all peoples and on every constructive, progressive movement that the peoples of the world in their several countries are anxious to carry out.

Campaigning for world peace is not a fad, nor the mere business of the idealist. It is the hardest headed business proposition confronting the world today. In the success of this campaign, the future of every worker, every man and woman, the future of their children and children's children,—indeed their very lives. Only through the achievement and maintenance of world peace can the present economic ills of the world be remedied.

A Clock That Speaks

Combination Radio and Electric Phonograph Is Result Of Experiment

After considerable experimentation, an inventor has produced a clock that speaks the time. The instrument consists of a combination talking clock, radio and electric phonograph all installed in a grandfather case. The clock not only speaks the hours and half hours, but also may be made to tell the time in the form of a cheerful greeting, such as "Good morning—six o'clock." The cabinet contains an electric radio receiver with dynamic speaker which is used for the talking clock voice, the radio, and the phonograph reproduction.

Good Roads In Ireland

Country Carrying Out Reconstruction Program Every Year

During the past five years, twenty-seven miles of concrete road have been laid in County Antrim. The programme which has been followed, has been the reconstruction of about five miles per annum of the worst sections of the heaviest trafficked road. During 1929, several of these sections have been linked up, and by the end of the year there will be one continuous seventeen miles long. This will be the longest stretch of continuous concrete road in the British Isles.

KIDNEY TROUBLE BACKACHE

Believes In the Pool

Present Low Prices No Cause For Despondency To Pool Members

In the editorial columns of the Alberta Farmer, dated July 10, 1929, reference is made to the fact that in spite of the existing depression in the wheat market, Pool members are not despondent. We quote from the editorial:

"On the contrary, when they look back to pre-Pool days they congratulate themselves that the Pool is functioning in this year of low prices. And they shiver when they think of what depths wheat prices might have gone had there been no Pool."

Pale People Are in Peril

Some Form Of Nervous Breakdown Always Threatens Them

Pale people are almost always nervous. Paleness denotes lack of blood and poor circulation. The results in faded nerves, sleeplessness, loss of appetite, and a general feeling of weakness. Dr. Williams' Pink Pills for Pale People are different from most other medicines—it is impossible to take them and not feel better. Their whole mission is to make red blood. This new blood strengthens the nerves and restores the vitality. Dr. Williams' Pink Pills for Pale People are different from most other medicines—it is impossible to take them and not feel better. Their whole mission is to make red blood. This new blood strengthens the nerves and restores the vitality.

DEEP PAIR

Ends in 1 Minute
This is a new and revolutionary method of treating the most common skin diseases. It is a simple and easy method, and it is guaranteed to give you relief in one minute. It is a new and revolutionary method of treating the most common skin diseases. It is a simple and easy method, and it is guaranteed to give you relief in one minute.

Experiments in Television
Broadcasting of a Play in English. Not a Complete Success.

For the first time in England the Baird system of television was supplied to the public, although still in the experimental stage, with the broadcasting of a play by the British Broadcasting Corporation. The piece chosen was Luigi Pirandello's "The Man With a Flower in His Mouth."

Let it be admitted at once that plays by television are as yet a subject for men of science and not for critics of the finer points of acting. The visual transmission is far from perfect. You feel yourself trying through a keyhole at some awkward, dazzling exhibition of the first prime mover. But if the process has left a long way to go before it is a subscriber of the British Broadcasting Corporation is fully satisfied by the results. The Baird system, as it is called, is a small cube, sliced diagonally by an effective plane of photo electric cells. The actor kept a close eye to the projector as a man with his head in a band box with his movements slow and deliberate. When another actress appeared a chequered screen passed across the "stage" and the scenery provided by C. R. W. Nevinson's designs looked out of a screen.

The television "stage" is perhaps the world's most intimate theatre, with the projector, L. De G. S. working in inches, where others work in yards. What its audience saw in the Baird system was an open postcard size of varying clarity. The London Times concludes its review by saying: "The men of the theatre may meanwhile rest in peace. The time for interest and curiosity is come, but the time for serious criticism of television plays as plays is not yet."

Luxury For The Desert
Tourist Camp Will Be Established In Central Australia.

Sydney, Australia.—New luxury will be introduced into the arid area of Central Australia by the tourist camp which the Commonwealth Railways Department is about to establish there. Camps which will be moved every day or two will be electrically lighted, there will be portable showers, radio receiving sets, portable gramophones. The catering will be of a particularly high standard. Experienced cooks will provide elaborate menus which would do credit to a first class hotel.

U.S. Trade Slump
Declines To Lowest Level In The Last Six Years

International trade of the United States during June declined to the lowest monthly level the country has experienced in the last six years. Exports amounted to \$229,000,000, a figure less than that of any month since July, 1924. Imports for the last month were \$255,000,000, which is lower than those recorded since January, 1922. Imports and exports for June were each approximately \$100,000,000 below those for the same month last year.

Delegates From Argentina
The Canadian Government, through its trade commissioner at Buenos Aires, has invited the Agrarian Producers' Union of the Argentine, to send a delegation to Canada to visit principal centres of production for studying modern methods of handling cereals as well as the Canadian grain elevator system.

Recognized as a leading specific for the destruction of worms in the "Graves" Worm Extirminator has proved a boon to suffering children everywhere. It seldom fails.

Come-to-Grief Alarm — I was trying to make a record. Farmer—Well, you've made it, but you're the first man to make it. The partner who climbed down a tree without having to climb up it first.

It cost Kaye Don and his backers \$250,000 to find out that a Silver Bullet is not as swift as a Golden Arrow.

The little green callophor humming bird is the smallest American bird.

Mindard's Liniment removes Warts, relieves Bunions.

Saskatchewan Wheat Pool

Ballots In Connection With Hundred Per Cent. Food Legislation Have Been Mailed Out

Ballots in connection with the referendum on 100 per cent. pool by legislation have been mailed out to all Saskatchewan Pool Growers who are recorded on the Company's books as shareholders and who are signers of the current contract. The question which is being asked the contract signers on the ballot provided is: "Are you in favor of your directors asking Government to pass a Grain Marketing Act to provide that all grain grown in Saskatchewan must be marketed through one pool, provided:

(a) That before the proposed Act should come into force it must receive a two-thirds majority vote in a special referendum of all grain growers in the Province to be conducted by the Government.

(b) That the grain pool to be provided should be entirely under the control of the growers delivering grain. And further, that all producers of grain (wheat Pool or Non-Pool), must have an equal voice in the control of the organization."

Persian Balm promotes cleanliness, charm and beauty. It is unrivaled in its magical effect on the skin. Slightly absorbed by the tissues, it leaves never a vestige of stickiness. Delightfully softens the skin. Stimulates and invigorates. Softens and makes the hands flawlessly white. Satisfies the appetite. It is a most valuable to the complexion. Persian Balm is the inevitable choice of the woman who cares.

May Recover Jewels
Gems Belonging To Nobility Lost In Airplane Crash

The London Daily Express says jewels valued at \$65,000 (about \$325,000), scattered over the ground near Memphis, Kent, at the time of the recent aeroplane disaster in which six persons, including three of the nobility, perished.

The jewels in question belonged to the late Viscountess Edman and the late Mrs. Lieflier, both of whom were wearing pearl necklaces and diamond brooches.

Accidental discovery of a few gems by a villager reminded friends of the dead women that they had their jewelry with them. Police are searching for the missing gems in the hope of finding others.

The Royal Canadian Mounted Police consists of about 50 officers and 900 privates.

Exhibition Grain

Grain To Be Shown At World's Grain Show May Be Grown Any Year

There still seems to be a strong impression in some parts of Canada regarding the year in which grain for exhibit at the World's Grain Show may be grown, says a bulletin of the show executive. It is well, therefore, to repeat that there is absolutely no restriction whatever regarding the season in which grain for exhibit is grown.

It may have been or may be grown in any year. Of course, because all exhibits must be in the hands of the exhibition authorities at Regina on or before the opening of the show on July 1, 1932, it will be impossible to grow Canadian grain for exhibit therefore, if not already grown, must be grown either this season or during the season of 1931.

Water Makes Crops

In the production of one bushel of wheat, nature uses in the form of water. This is but one of the very interesting facts disclosed in studies of soil moisture and production by experts of the Dominion Department of Agriculture.

Her Two Children Had Summer Complaint

Mrs. J. J. MacDonald, Glace Bay, N.S., writes:—

"I am the mother of six children, and would not be without a bottle of Dr. Fowler's Extract of Wild Strawberry in the house. My two youngest were very sick with summer complaint, and there was nothing I tried could equal that remedy, and I had tried most everything, but they could get no relief. Dr. Fowler's made a change in both of them in less than two hours."

On the market for the past 85 years; put up only by The T. Millers Co., Ltd., Toronto, Ont.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Parafilm Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh, delicious! Parafilm keeps them from staling.

Get Parafilm in the handy, sanitary knife-edged cartons. For free catalogues use any Appleford's 'Centre Pull' Packs in each form.

GIANT DIRIGIBLE R-100 REACHES ST. HUBERT PORT

Montreal.—After a weary wait, Great Britain's giant threat for the supremacy of the skies, hovered over St. Hubert airport, early on Friday, August 1st. Just a little over three days after leaving Cardington, England, the R-100 reached the mooring mast, marking the end of the transatlantic flight. Fair weather caused a delay of several hours, and cut down the speed after reaching the Gulf of St. Lawrence.

As newsmen and ground crew awaited, the dirigible was first sighted 10 miles northeast of St. Hubert at 2:04 a.m. Eastern Daylight Saving Time, and was travelling slowly east toward the illuminated landing field. Half an hour later the huge, silvery silhouette could be seen, barely moving, at an altitude of about 500 feet above the ground.

The final appearance of the sky-wanderer after many hours of waiting, was the signal for an outburst of cheering from those at the airport. Behind the high fence surrounding the field, too, were perhaps a thousand people who had come for the first a morning day, then a wind-storm and rain.

It was not the first time the R-100 had experienced trouble with its fabric skin. On its first extended flight over England the fabric tore on the tail surfaces. The next day the ship was rather extensively remodelled in an effort to prevent a recurrence.

The ship stopped over the Island of Orleans for two hours while repairs were made to the damaged fabric on her fin. The cloth was torn while the big airship was aloft with almost without sight of Quebec.

A large square of loose fabric was noticed in the top of the envelope. Captain Henry St. Martin, of Montreal, piloted the ship. "A plane flew within some miles of the airship and noticed that she was barely holding her head in to the wind."

"There seemed to be a tear in the top of the bag," Captain St. Martin said, "she hardly seemed to be moving."

She seemed almost to drift by Quebec, the noise of her motors being hardly audible from the ground.

Soon after passing the Quebec bridge the R-100 took up her engines and her speed appreciably increased. She was flying at about 1,000 feet.

The shores of the St. Lawrence in the neighborhood of the villages were crowded with people eager to get a glimpse of the monster as she sailed by on the last leg of her trip.

Imperial Conference

Premier Ramsay MacDonald Says Problems Of Unprecedented Difficulties To Be Faced

London, Eng.—The Imperial Economic Conference in London, which opened today, will face a series of unprecedented difficulties, Premier J. Ramsay MacDonald told a meeting of the United Kingdom Branch of the Parliamentary Association in Westminster today.

The year is going to be one of the great, deeply marked years in history, thought the premier. Whoever had the responsibilities connected with the Imperial conference would not only succeed by skilfully practicing the art of blending lessons of the past with the outlook on the future. While believing in party government, he felt an attempt should be made to get Imperial questions considered first by all parties.

After all, he declared, the commonwealth and the nations which compose it are very much greater than any one party.

Declined To Receive Deputation

London, England.—A parliamentary committee appointed to deal with grievances of Indians in Canada, informed a delegation of Six Nations Indians from Brantford, Ont., that it Hon. J. H. Thomas, Minister of Dominion Affairs, had declined to receive the deputation on the ground the grievances claimed were a matter for consideration by the Canadian Government.

Body of British Flyer Is Found

London, England.—The Evening News carried a despatch from Hangoon which said the body of the British flyer, Eric Hook, who disappeared in the jungles of Burma, was little more than a skeleton. It apparently had been terribly mutilated by a leopard or a tiger. Hook was seen when his plane was forced down on an attempted flight to Australia recently. His partner was saved.

CANADA'S PREMIER-ELECT

BENNETT PROCEED TO FORM HIS NEW CABINET

Ottawa, Ont.—A special session of parliament—probably on or before September 11—is a certainty. Carrying out his promise to the Canadian people to deal with unemployment "immediately after July 28," Premier-elect Hon. R. B. Bennett is already taking action in this direction as the first step towards the implementation of the pledges he gave during the recent campaign.

Tuesday, September 2, looks as the probable date for by-election day if any minister selected by the Conservative chief minister, with the administration happens to be opposed.

By-election writs will likely be issued as soon as Mr. Bennett takes office as Prime Minister, with nomination day likely set for August 18 in case any chosen minister represents a constituency in which under the Dominion Election Act, two weeks must intervene between nomination and polling day.

By-election writs will likely be issued as soon as Mr. Bennett takes office as Prime Minister, with nomination day likely set for August 18 in case any chosen minister represents a constituency in which under the Dominion Election Act, two weeks must intervene between nomination and polling day.

Improved Crop Conditions

Betterment During the Past Week Is Reported In Some Areas

Ottawa, Ont.—Crop conditions have improved, particularly in central Saskatchewan and Alberta, according to the weekly crop report issued by the Dominion Bureau of Statistics. In Manitoba there has been an increase in severity of stem rust infection, some stands in the central and southern sections of the province having infections ranging from 30 to 75 per cent.

The report continues: Western weather since our report of July 24, has been hot, with scattered showers and some good rains. Precipitation was heaviest in southern Manitoba, in central Saskatchewan and in central and northern Alberta. Frost, sufficient to which which recorded beneficial rains during the previous week. The first low temperatures of the harvest season were recorded from northern and southern sections of Alberta and from Victoria, Saskatchewan.

Crop conditions show a further betterment during the week, particularly in central areas of Saskatchewan and Alberta. Frost, sufficient to which which recorded beneficial rains during the previous week. The first low temperatures of the harvest season were recorded from northern and southern sections of Alberta and from Victoria, Saskatchewan.

The full text of the wire from the Dominion rust research laboratory at Winnipeg is as follows:

"Weather conditions were favorable for stem rust development in past week. Decided increase in severity of infection on common wheat throughout Manitoba, but heavy stands in central and southern Manitoba have infections ranging in severity from thirty to seventy-five per cent. Injury also apparent in certain fields of this area. Light stands much less affected by rust. Early winter weather ready to cut in about a week. Only traces rust on durum wheat. Stem rust increasing on barley, severely on wheat and barley and pastures appearing on necks of plants. Leaf rust found on wheat in Alberta, but no stem rust yet reported."

U.S. County Judge Sent To Prison

New York.—W. Bernard Vause was sent to county jail in Brooklyn, New York, for the severity of his sentences and who once recommended the whipping post for criminals, was sentenced to six years in federal prison. Judge Vause was found guilty of using the whip in the conduct of the defunct Columbia Finance Corporation.

Report Massey Has Resigned

Toronto, Ont.—The Mail and Empire in a news feature says: "Hon. Vincent Massey is understood to have forwarded to Rt. Hon. W. L. Mackenzie King his resignation of the post of Canadian High Commissioner to Great Britain and to have asked that Hon. R. B. Bennett be so advised."

Protest Against Use of Liquor

Washington.—A protest against the use of liquor at the British Empire Exhibition has been received by Sir Ronald Lindsay, from Samuel B. Woods, former Mayor of Charlottesville, Va., and an ardent dry.

Ottawa, Ont.—A special session of parliament—probably on or before September 11—is a certainty. Emphasizes Independence

Premier Hertzog Says South Africa Has Right To Succeed From British Commonwealth

Pretoria, South Africa.—Emphasizing the complete independence of South Africa and her right to succeed from the British Commonwealth of Nations if she ever in the future desired to do so, Prime Minister Jan Smuts delivered an important speech on the eve of his departure for the Imperial Conference in London, England.

"No iota of our independence will be sacrificed," he said, "I am convinced we possess complete independence. The people of South Africa will be prepared to an ever-increasing extent to heartily maintain co-operation with Great Britain and the other Dominions. But co-operation will depend on national independence. In no circumstances will the right to succeed from the British Commonwealth be taken from South Africa."

India Boycott Continues

Agitators Plan To Intensify the Civil Disobedience Campaign

Bombay, India.—With plans for intensifying the boycott against British goods and intensifying the civil disobedience campaign believed to be the principal agenda, the working committee of the All-India Congress opened its sessions recently.

Only ten of the committee members were present, 21 being in prison on various charges preferred by the government. The sessions, held in closed doors, were expected to continue three and possibly four days. Vallabhbhai Patel presided.

Members of the committee said the peace plans of Sir Tej Bahadur Sapru and Mr. Jayaprakash Narayan would be considered. They added that the negotiations certainly would not influence the committee's decisions.

Party Standing

Toronto, Ont.—The Canadian Press summary of the standing of the parties in the Dominion election is as follows: Conservatives, 138; Liberals, 86; U.A.P., 10; Progressives, 2; Labor-Progressives, 3; Independents, 2; Labor, 3; doubtful, 1; total, 245.

GOVERNOR-GENERAL VISITS FIRST CANADIAN HEALTH UNIT

Winnipeg, Man.—Hon. T. A. C. Crean, Minister of Railways, who was defeated in Brandon constituency in the federal elections, before leaving for Ottawa, said he "had nothing to say" regarding possible plans for his return to the House by a by-election in some constituency.

"A Great Deliverance"

St. John, N.B.—Hon. J. B. E. Macer, Premier of New Brunswick, discussing the Dominion election results said: "I think Canada has sustained a great deliverance."

REES TROUBLE BREWING

Chinese Pillage Homes

Communists Loot and Burn Foreign Holdings
Shanghai, China.—In the most serious devastation of foreign property in China for many years, Communists looted and burned all or nearly all foreign holdings at Changsha, capital of Hunan province.

Foreigners generally were safe aboard British, United States and Japanese gunboats, five miles down the Siang River. Four missionaries who lectured to remain in the city were unaccounted for.

Changsha was divided into 50 districts for pillaging. Directed by leaders, the despoilers carried foreign effects into the street as plunder before firing the buildings. Coolies looting were harangued by the Red leaders, and many were persuaded to join the Communist army to seize a share of property "wrongfully possessed by the upper classes."

Despatches said foreign consulates and large office buildings on Shullia Island opposite the city probably would be destroyed. Most of the foreign property already burned amounted to millions of dollars. The total could not be estimated.

Saskatchewan Egg Pool

Increase In Prices Over Those Paid In 1929

Regina, Sask.—An increase in prices over those paid for the same period in 1929 is noted in the final payment of the Saskatchewan Cooperative Poultry Producers' Egg Pool, cheques for which are now being prepared at the head office. The payment covers the cost of the pool of the year, which closed Saturday, July 19.

The amount being paid are: Extras, 22 cents; first, 19 cents; seconds, 17 cents, and crux, 15 cents. They are net cash, plus shipping points, freight shipments.

NATIONAL WORKS

GO ON UNDER NEW GOVERNMENT

Ottawa, Ont.—The tide of party success ebbs and flows but the great national undertakings of the Dominion go on. Several governments have been formed and dissolved, but the work of the national departments has continued.

Only ten of the committee members were present, 21 being in prison on various charges preferred by the government. The sessions, held in closed doors, were expected to continue three and possibly four days. Vallabhbhai Patel presided.

Members of the committee said the peace plans of Sir Tej Bahadur Sapru and Mr. Jayaprakash Narayan would be considered. They added that the negotiations certainly would not influence the committee's decisions.

Many Changes In Portfolio Of Immigration

Ottawa, Ont.—Who will be the new ministers of immigration, many names are being forecasted. Some think Hon. Robert Rogers will get the post. With the change of government the conference on immigration will not likely be held at least until after the Imperial Conference.

Immigration has had more variety in the matter of homes during the last ten years than any other department of the government. In 1921, Hon. James Calder was minister of immigration. Previous to the election of that year however the cabinet was headed by Meighen and Hon. Dr. J. W. Edwards took over that portfolio. He was defeated at the polls and the Meighen Government was beaten.

In forming his ministry, Premier Meighen first got rid of the immigration portfolio to Hon. Charles Stewart along with Interior. In 1923 however, Hon. James A. Robb took it over and held it until the reorganization of the cabinet before the 1925 election. Hon. G. N. Gordon was the last minister of immigration. He met defeat in the election and the department came back to Hon. Charles Stewart.

In 1926, Hon. Dr. Meighen was minister of the department for a short time and then went to the Interior. With the return of Mr. King's government, Hon. Robert Furke became head of the department and remained in that position until December 1929, when he went to the senate and was replaced by Hon. Henry Duggan. The present minister is Hon. Ian Macdonald who was named last month. The election campaign was a hard one for him, but he had to pass were forwarded to him there. Now there will be a new minister, but whether he will be a minister or two in the life of the Immigration department. There have been changes in the last ten years and another one coming.

World's Largest Aerial Fleet

Twenty-six Airplanes Engaged in Aerial Work For Government

Twenty-six airplanes, working in thirteen detachments, are now engaged throughout Canada in aerial photography and surveying for the Canadian Government.

For the past few years Canada has been the leader in the work of aerial photography and surveying for the map making and in making aerial surveys of large areas of practically unexplored territory. This year a program of such work has the world's largest aerial photographic fleet on the task. Before the end of the season probably at least another hundred thousand square miles of country will be recorded on photographic negatives.

As in recent years the Forest Service of Canada will continue to carry on the work of forest fire protection in the provinces of Manitoba, Saskatchewan and Alberta, for the season of 1929, and for this purpose has arranged to continue the co-operative arrangements which it has had in the past with the Royal Canadian Air Force. In this year the aerial patrol work is carried on approximately 100,000 acres, of which a large portion is unexplored. For this purpose 21 seaplanes and flying boats will operate to detect and suppress forest fire outbreaks. These machines will be capable of carrying greater loads than in other years and their better performance should add greatly to the efficiency of fire-fighting operations.

Of the thirteen detachments engaged in aerial photography and surveying one is operating in British Columbia; one in Alberta; four in Manitoba, Saskatchewan, the Northwest Territories; four in Ontario and Quebec; one in the Maritime Provinces; one has been assigned to special transportation work and the co-operation of the exploratory and exploratory of the main aerial routes in the Far North. The experience of the last few years has shown that at least for many years aerial transportation will be almost the sole means of communication throughout these vast and little-known areas. The exploration of safe-flying routes is, therefore, regarded as one of the first considerations towards opening up this country.

Furriers Use Cat Skins

Demand in London Results in Loss of Household Pets

English folk are mourning the mysterious disappearance of pet cats, and it is all because Dame Fashion has decided that every well-dressed woman must possess a fur coat. Those with small purses cannot afford enormous sums, so a cheap fur has had to be found. One such situation. The cat possums creep round the streets looking for stray cats. When they find a victim, it is skinned, pushed into a sack and then taken to their clearing station. The West End of London has been the chief area of the possums' activities, but now reports of the strange disappearance of cats are coming in from all parts of the country. So cat owners should be on their guard lest their pets, too, are spirited away by possums.

Was Adam a Chinaman?

Scientists claim discovering further evidence that Adam and Eve were Chinese, and that the Garden of Eden is to be found in Central Asia. This is based upon reports from Dr. Davidson Black, of the Peking Union Medical College, that he has unearthed skulls having jaws and teeth of men who very likely lived 500,000 years ago in the pre-Neolithic days.

Outboard motors are now equipped with electric starters.

"I give board and lodgings and \$3 a month. Will that suit you?"

"Yes, ma'am. If you give me food for me to come only three days a month." — Pages Gages, Yverdon.

The Old-Time Doctor

Medical Fees and Prices of Operations Show Little Change in Last 100 Years

Proof that medical fees and the price of operations have changed very little in the last 100 years in Canada is contained in the interesting tariffs of medical fees for the years 1829, 1855, 1871, recorded in a exhibit at the Ontario Medical Association convention.

A schedule of medical fees adopted at a meeting of the medical profession at the hospital in Toronto on February 14, 1829, quotes the minimum doctor's fee in the daytime at 5 shillings, or approximately \$12.50. Pulling teeth was extra. Each extraction cost 2 shillings, 6 pence, about 62 cents extra. In addition, a doctor could charge 5 shillings a mile travelling expenses for country cases. The mileage was to be computed from the market buildings in Toronto. Bleeding, then common, also was the same price as the extraction of a tooth. A major operation cost £10 or \$50, and a minor operation brought fees of from \$5 to \$10.

In 1855, fees were settled at \$2 maximum, and \$1 minimum. But after sunset the physician could charge anywhere from \$2 to \$5. He got from \$40 to \$200 for a major operation, and from \$2 to \$40 for a minor.

Had the Password

Invited Guest Admitted To Restaurant

A short time ago on an ex-New Yorker, returning from some years abroad, decided to revisit some of the haunts of his youth, among others, the Italian restaurant downtown where he remembered getting delirious. He had a friend, an old friend, gave the address and description of the restaurant as it had been when he knew it, and arranged to meet there for dinner. On reaching the place, however, he found it strangely changed; the house grimed, the windows boarded up, the entrance apparently downstairs. He rang the bell, a man peered out at him, and an unfortunate scene ensued, in which the gentleman expostulated, told of past days there, described the old proprietor—al so to avail; the door slammed shut again. He hurried back to his hotel, to telephone his friend, apologize and arrange another meeting place. It was not, however, until nearly midnight that his friend responded, explaining that he had been dining in the restaurant, wine and dining, all that time. "But how did you get in?" he demanded. "Oh, I just gave your name," the friend explained, in surprise. "They let me right in." — New Yorker.

Building the Silo

Details of Construction Of Three Types of New Silos

In building a good silo the three types to be considered are: The walls should be impervious, strong, smooth, and their construction presents no particular difficulties. Complete specifications and detailed instructions with respect to the construction of silos of these types are available without charge in pamphlet No. 118 (New Series), now available through the Publications Branch of the Department at Ottawa.

Poem Became Famous

Mrs. Rose Hartley, of San Diego, California, author of the famous poem "Curfew Shall Not Ring Tonight," celebrated her 80th birthday on July 15. Mrs. Hartley wrote the poem when she was 16 years old. It was first published in 1870. The editor wrote to her saying he could not pay for her verses, but that he would offer her a year's subscription to his newspaper. The poem met with instant favor and was reprinted throughout the country.

Labor Parties Get Together

The national executive of the Labor Party and the administrative council of the Independent Labor party met in the British House of Commons to discuss the relations of the two bodies. It was decided that Mr. Hon. Arthur Henderson, of the Labor Party, and James Maxton, of the Independent Labor Party, should draw up formula with which the two organizations can work together.

The fruit of the so-called cream of the crop of the South Africa, forms a most excellent cream.

Some of the detours are not even paved with good intentions.

Rust Research

Plant Pathologist From England Will Devote Year To Investigation Work In Canada

W. A. R. Dillon-Watson, M.A., advisory plant pathologist of the School of Agriculture, sailed from England for Canada, to spend a year with headquarters at the Dominion Rust Research Laboratory at the M.A.C.

Mr. Dillon-Watson's exchange with Dr. J. H. Craigie is made possible by the assistance of the research committee of the British Empire Marketing Board.

On arrival in Canada, Mr. Dillon-Watson will visit the various plant pathology laboratories and the experimental farms in the east, and will be the guest, for a time, of Dr. Archibald at the Central Experimental Farm, Ottawa, and will then come on to Winnipeg where he will study the work done by the laboratory here in connection with the stem rust of wheat and the breeding of rust-resistant wheats.

Mr. Dillon-Watson is widely known for his investigations work in the general field of plant pathology and more especially in connection with the work on stem rust in wheat.

He has, for a considerable time, been associated with Sir Henry Havel, known the world over for his work in plant pathology, and the recognized leader in pioneer work in regard to stem rust of wheat.

The faculty of the Dominion Rust Research laboratory here are looking forward with keen pleasure to meeting Mr. Dillon-Watson and hope to make his year in Canada as interesting to him as they feel assured Dr. Craigie's year will be in Great Britain. — Free Press.

Pure Swank

The Days Of The Monks Are About Over

Monks, long the trade mark of the stage Englishman, are rapidly disappearing in their homeland. One sees very few single glances in these days. They are worn mostly by college lads who plain window glass, and by old-timers who quired the habit back in the good old Victorian days and can't quit it off now. Ask the monodromy one who fosters this peculiar vanity, and he will tell you that he has one bad eye. You know him well, and press further, he'll admit it is pure swank.

Perils To Trees

Leakage of electric current from high-power transmission lines often causes serious injury to trees. Ask the monodromy one who fosters this peculiar vanity, and he will tell you that he has one bad eye. You know him well, and press further, he'll admit it is pure swank.

Four pairs of twins who attended a school at Mowell Hill, London, England, have all won scholarships.

Adopt Pale-Face Son

Mark Poucette, Stony Indian brave and star performer at "Indian Days" celebrations at Banff, each July, and his wife, were heartbroken in 1914, for they had lost their three sons and were childless. The last of them, John Poucette, had been the particular pal of Dave White, son of a pioneer merchant of Banff, Dave White, Sr., who has been dealing with the Stony Indians for years and is highly respected by the tribe. In 1915 the bereaved Indian parents asked Mr. White if they might "share" his son. He agreed, and Mark Poucette, in a simple but touching ceremony, christened little Dave "John Mountain Stony" and declared the now my boy too as now my son. "It was fifteen years ago and little Dave is now a grown man. He is shown in a magnificent head-dress, made by Mrs. Poucette, together with his foster-father, outside the Poucette's tepee.

A Radiant Hughes

Interesting Experiment Conducted At The Edmonton Exhibition

At the Edmonton Fair, Alberta, an interesting phenomenon of radio drew large crowds to the Journal Building, where the radio is produced in the Midway. By placing one's hand in front of a small microphone, owing to the electrical coupling of the hand, a loud sound was observed. A lightous laugh while a tiny electric current was passing through the hand. On the withdrawal of the hand the light went out and the sound ceased.

Hundreds of people, and thousands of children made this remarkable experiment and demonstrated a profound truth regarding their own bodies of which they were doubtless unaware, the unconscious influence which each and everyone is capable of exerting.

Today the world is measuring its light and sound by wave lengths, and scientists are agreed that the healthy man and woman are in reality beings of mankind through the radiant truth regarding their own bodies of which they were doubtless unaware, the unconscious influence which each and everyone is capable of exerting.

Early Advertising

Roman Workman Had The Right Idea 1800 Years Ago

"Balbus made it." These words were stamped in Latin on a bright metal tablet which was found in a tomb by workmen digging the foundations for a new building near the Roman Bridge, London, England. They found the polished at the base of a Roman wall, with a Roman sword, almost identical with a modern sword heide it. Balbus was evidently one of the first men who perceived the value of advertising.

"Balbus made it" has also been found on other Roman utensils. His advertising enterprise was preserved his name for 1800 years.

Neither One

Stenographer "How's spell some?"

Boss—"Dollar and cents or horse?"

Stenographer—"Well, like in 'I ain't seen him sense'."

A World Language

Theory That the Radio May Bring Languages Into Disunion

The suggestion that the need of a world language has been given compelling impetus by the development of the radio is probably open to challenge. That a universal speech would aid universal peace has been widely recognized. The increasing number of international conferences, estimated now at 300 a year, ranging from "hygieneists to free thinkers," is possibly also accelerating the desire. Commerce, too, would be facilitated by the adoption of a common medium of communication.

But practical difficulties should not be overlooked. Linguistic amalgamation is something civilization has resisted for 10,000 years. The ancients travelled widely over what was then the known world without the necessity of first learning foreign tongues. Nor have closer contacts broken down the barriers. German persists in Austria and in Pennsylvania. French flourishes in Quebec. Grand efforts have been made on both sides of the Atlantic undisturbed by the annoyances which an alien grammar and syntax often impose on the schoolroom. Heretofore has been welcomed here by great audiences to whom her lines might as well have been spoken in Chinese.

These traditions will not be easily upset by the popularity of the radio. It is too firmly fixed. A culture that starts in the cradle cannot be the grave in more cases than it yields to intellectual adventure. Latin and Anglo-Saxon races have met from each other, but they do not coalesce. Compromises on artificial languages like Esperanto are even less likely. We have made only slight headway in cosmopolitan-mindedness, and our compatriot ear is still on the deaf side. — Philadelphia Inquirer.

May Sell Estate

Reported That Earl Of Egmout Has Decided To Dispose Of Avon Castle

Frederic George Trevelyan, the famous Earl of Egmout, has decided to sell not only Avon Castle, in Hants, the ancestral seat of the Earls of Egmout, but also the baronies, silver and pictures, which go with the estate. The reason for the sale is that the Earl is in the death throes of the estate of his kinsman, the ninth earl, and the duties which his own estate must eventually be, states Lord Egmout in explanation.

Some few weeks ago that Frederick George Trevelyan's right to the title and its properties was confirmed by a judge of the high court.

The earl says he will sell the movable estate. "I want to see what I can do with them and what I can do before putting a price on the castle," he added.

The present and tenth Earl of Egmout succeeded to the title last year. He was formerly an Albanian rancher. His claim was contested by two persons, who traced descent from earlier earls, but the ninth earl, armed with the family tree, had designed the Altonian as the basis of the high court upheld the present earl.

Two Modest Fiefs

When Colonel Lindbergh and Squadron-Leader Kingford-Smith met in New York, each credited the other with having made the outstanding flight in aviation history, and in a way each was right. The incident shows that the two are very capable and courageous men who retain their sense of proportion in the face of their great achievements. Because of their modesty the world regards them with both admiration and kind feeling.

A Happy State

I would I were beneath a tree; A-sleeping in the shade of one. With all the bills I've got to pay, Paid!

I would I were beside the sea, Or sailing in a boat. With all the things I've got to write, Wrote!

I would I were on yonder hill. A-hacking in the sun; With all the work I've got to do, Done!

Talkies For Blind and Deaf

A little apparatus is to be installed in the Royal School for the Blind at Leatherhead, England. Officials of the institution say that the "talkies" will be able to follow the story by sound, the partially blind will see and hear, and the deaf will hear of whom the school contains a number, will see the film.

Motorcycles in France now number more than 300,000.

Women Direct Poultry Pool

Saskatchewan Poultry Pool Is Practically All-Females Organization

Farmers' wives host the Saskatchewan Poultry Pool and the pin money they take in almost 100 times is written in the figures.

The pool, an almost 100 per cent. all-female organization, is four years old, and last year took in a sum of \$730,000. There is only one man with his finger in the pie, and he is outnumbered if not suppressed.

In the last 12 months the business turnover of the pool included 28,400,184 eggs, or 2,234,082 dozen, valued at \$249,000. Also included in the turnover were 823,743 pounds of dressed poultry, valued at \$184,000, and 30,601 pounds of live poultry, worth \$6,000.

The egg business increased in 1929 over 56 per cent, and the dressed poultry 41 per cent. over the previous year. The pool now handles about 75 per cent. of the entire production of eggs in the province of Saskatchewan.

Mrs. Bertha Holmes, of Asquith, Sask., is president of the organization. She is known officially as the Saskatchewan Co-operative Poultry Producers, Limited, and five women are on the board of directors. Originally the pool was established by the women to promote pin money with pin money. Now they are buying automobiles on their earnings.

Behold—the Hen

Everyone Can Take a Lesson From the Industrious Burying Fowl

"Did you ever stop to think—that had times mean nothing to a hen? She just keeps on digging worms and laying eggs, regardless of what the newspapers say about conditions. If the ground has no cracks, she scratches harder. If it's dry she digs deeper. If she strikes a rock, she works around it. But she never stops digging worms and turns them into handsome profits, as well as tender broilers. Did you ever see a pessimistic hen? Did you ever know of one starving to death waiting for worms to dig themselves to the surface? No! She has one cash book, and she times were hard? Not on your life! She saves her breath for digging and her cackle for eggs."—Exchange.

New Kind Of Goliath

Near-Sighted Lady Mistook Excited Child For Do!

The other day a kind lady took the minute, funny child of one of the Harmony Kings, a negro quartet, to a big London shop to buy a present, says Mr. Gossp in the Daily Sketch. While she turned to talk to an assistant she left the child, rigid and wide-eyed with excitement, sitting on a chair among the dolls. When she turned round again she was horrified to find a short, stout old lady in constant contact with another assistant. "What," she was asking, "is the price of this galling?" "It does not appear to be galling," said the assistant, "it will go and inquire."

Four Good Habits

If Cultivated Will Help Greatly In Attaining Success

There are four good habits—punctuality, accuracy, steadiness, and despatch. Without the first of these time is wasted; without the second, mistakes the most hurtful to our own credit and interest; and of others, may be committed; without the third nothing can be well done; and without the fourth opportunities of great advantage are lost, which it is impossible to recall.

Sam—"I was just sowing my wild oats."

Dud—"All right; I'll attend to the thrashing."

Housewives of Edinburgh, Scotland, are just beginning to use electric washing machines.

"Don't you know that fishing is forbidden?"

"I'm not fishing."

"Then what are you doing?"

"Teaching 'em to swim!" — Blues Harmon, Madrid.

Prices Of Livestock Reveal Remarkable Strength Compared With Other Farm Products

In the price changes that have taken place in farm products, as also in other commodities, in the last 12 months, livestock food products stand up with outstanding strength. Lambs, hogs, and cattle—in that order—are now at a much higher level relative to the value of the same products a year ago than are butter, wool, wheat, and barley.

Prices for farm products in Canada have changed considerably since last summer and especially during the first half of 1930. The tendency of all classes of livestock, wheat, feed grain, butter, and wool, which are fairly representative of general farming, has been downward.

A noteworthy feature is that the price level of livestock has not dropped so much as that of other farm products and they are the only items to show seasonal strength within the last two months.

The accompanying chart shows the percentage changes in relation to each other and in each commodity. The monthly average prices as reported officially have been taken and the changes from month to month

expressed as a percentage of the prices existing in July, 1929, which are taken as the base of 100. The table on this page gives both the monthly prices and the percentages for each item of the last year. In the chart only the percentage changes are shown.

A glance at the right hand side of the chart will make it plain that at the end of the period three items, lambs, hogs and cattle, were well above butter and far above wool,

Western Flour Mills Industry Ranks First In Manufactures In Alberta and Saskatchewan

The flour and grist mill industry ranks first among the manufactures of the two of the three prairie provinces. This industry comes first in both Saskatchewan and Alberta, and second in Manitoba. First position in Manitoba is held by slaughtering and meat packing, which is third in Saskatchewan, and second in Alberta. Second position in Saskatchewan is occupied by butter and cheese, which is fourth in the last named province. In Alberta, in point of production value, flour and grist mill products in Alberta, and slaughtering and meat packing in Manitoba were almost equal in 1929, the former having a value of \$21,000,000, and the latter of \$21,288,000.

Growing Exhibition Grain

Practical Suggestions For Preparing Grain For World's Grain Show At the recent meeting of the Manitoba Seed Growers' Association at Brandon, Dr. McFlettie, agronomist of the M.A.C., gave the following practical suggestions for the growing and preparing of grain for exhibition at the World Grain show in Regina in 1932.

Dr. McFlettie stated that the first essential was to obtain good, clean seed, pure as to variety since the grain samples will naturally be thrown. The seed should then be sown on clean land to avoid mixing from volunteer growth. Treating for both house and covered smut would avoid loss from this source. Sulphur dusting and early seedling would overcome the shrinking due to rust damage. A satisfactory sulphur dust can be procured from F. H. Wiley, 533 Henry Avenue, Winnipeg, and a small hand duster from the Niagara Sprayer Company, Middleport, N.Y. An application at the rate of 45 pounds of dust weekly from the time when rust first appears on the plants has usually given a fair control of rust.

In harvesting select the best sections in the field, pull out all other type plants and any other grains since it is much easier to clean the field than it is to clean later. Avoid any marginal material because it is usually later and somewhat coarser. All grain should be left to mature before it is cut. After cutting it may be as well to cure some both ways. If cured outside it should be put up in small shaves in small stooks but is cheaper in small stooks than in caves. If inside, it should be hung up in small stooks, in dry well-ventilated rooms. For threshing a small rubbering threshing has given good results or it may be found advisable to thresh it out by hand.

In finally preparing the grain samples it is essential to obtain one with grains of similar size and shape. This can only be accomplished through a great deal of painstaking work with different sizes of different cleaners, etc.—Free Press.

Creates a New Record

Crop Report For British Columbia Is Very Gratifying

British Columbia's annual crop report issued by the Department of Agriculture shows that agricultural production for the year 1929 totaled \$42,032,800, which is an increase of \$3,908,847 over that of the previous year and creates a new record. While this increase is due to some extent to prevailing high prices, substantial increases are shown in the volume of production of livestock, poultry products, dairy products, grain, hogs, wool, hops and vegetables other than potatoes.

A campaign to print all menus in English has been started in London.

Creamery Butter Production In Prairie Provinces Shows Increase Over Last Year

Gatineau River

First Record Of The Name Of This River Appears In Year 1788

When Champlain in his second of the Ottawa River in 1613, reached what is now the state of the capital of the Dominion, on June 4, he noticed a tributary coming from the north. The river was the Gatineau. Champlain gives no name to it and as far as the Geographic Board of Canada is aware the first record of any name for the river does not occur till 1788. In that year, Lieut. David Jones made a report to Governor Halliwell in which he mentions coming "to the river Letton (Gatineau), and from thence about a league to Shawanoe (Chaudiere Falls)".

Named By Franklin

Natural Inlet and Coronation Gulf Named In 1821

Natural Inlet and Coronation Gulf were so named in 1821 by the celebrated Sir John Franklin, 1790-1846, who led his first overland expedition to the Canadian Arctic in 1819-22. The gulf was so named because it was the Coronation year of His Majesty George IV. The name "Natural Inlet" commemorates Henry, third Earl of Bathurst (1793-1834), who was, at the time the name was given, Secretary for the Colonies.

(By Anabelle Worthington).

The latest summary of conditions in the dairy industry by the Dairy and Cold Storage Branch of the Dominion Department of Agriculture affords some observations of interest:

Fusterized butter graded during June, this year, amounted to 150,862 packages, an increase of 18,162 packages over the same period last year. For the year to date the 1930 figure at 248,511 is 8,924 packages ahead of last year.

Cheese graded during June, this year, totaled 299,176 boxes, or 17,384 boxes less than last year. The total for the year to date at 317,435 boxes is below last year, but there is an increase in the number of boxes graded "special" this year.

There was an increase of 245.66 per cent. in the volume of creamery butter in storage in Canada as at June 1, 1930, over the amount in storage at the same date last year; and an increase of 438.87 per cent. in the volume of dairy butter in store. Creamery butter in store June 1, 1930, amounted to 10,798,325 pounds of butter in store—369,035 packages.

Cheese in store the same date amounted to 6,471,834 pounds, or 38.43 per cent. less than last year. The export of cheese from Canada to the United States has practically ceased since the tariff of 68 cents per hundred pounds of cream cheese formerly exported is now being made effect on June 18. Much of the cream into butter.

Creamery butter production in the Prairie Provinces shows a steady increase over last year—increases during May were: Manitoba, 29.5 per cent.; Saskatchewan, 7.7 per cent. and Alberta, 15.1 per cent. over May of last year.

Pastures and Proteins

Work Carried Out Which Will Be Of Great Interest To Dairyman

The value of pastures depends very largely on the amount of protein—protein feed—available to the cattle using them. In this connection the studies of "close grazing" now being made by experts of the Dominion Department of Agriculture are of importance. Briefly put, the object of close grazing is to provide an adequate and continuous supply of green fodder from succulent new herbage growth. This is done through the division of a suitable field area into four equal sections. While the herd grazes for a week on one section the new growth, rich in protein, is developing in the others. In this way a new pasture with three weeks growth of new herbage is regularly available.

British Railways Are Progressive

Railways Preparing To Gain Control Of Air Services

Having acquired control of much of the motor-coach operation in the country, railways of England are preparing to capture control of air services. Under powers acquired last year, the railways may operate airways. As soon as the large cities are in position to provide centrally situated aerodromes the rail lines will be prepared to run their own aeroplanes for passengers, express and freight, in combination with the train and steamship services. The railways expect to have within a year at least an 85 per cent. interest in all motor coaches in the country.

A colorocope which matches colors more closely than the eye has been invented by a New York physicist.

The canvassback duck can fly at a speed of almost 100 miles an hour.

Singapore, British Malaya, is to have a skating rink.

National Map of Canada

Area Of Canada Is Greater Than That Of Europe

The area of Canada is calculated to be 3,684,723 square miles, an area greater than that of Europe. Of this area only a small fraction has been adequately mapped. The Topographical Survey, Department of the Interior, is engaged in mapping portions of the country and is issuing as rapidly as possible sheets of the National Topographic Map of Canada. During 1929 four such sheets were published, nine in 1927, eleven in 1928, and seventeen in 1929.

Agricultural Short Course

Course For Departmental Judges Held Annually At Guelph

A short course for departmental judges was held recently at the Ontario Agricultural College. Over 125 were present, including judges of ploughing matches, standing feed crops, heavy light horses, beef and dairy cattle, and sheep and swine. Classes were started some 15 years ago, and are primarily to get judges together for purposes of demonstration so that a uniform standard may be maintained for judging at shows and competitions.

Doing Much To Strengthen The Demand For Better Qualities

Of Beef

The beef grading policy of the Dominion Livestock Branch is not only providing a real service to the Canadian consumer and producer in clearly identifying the true qualities of beef, but is also attracting attention in the British market. The Imperial Food Journal, a recognized authority on market conditions in the Old Country, writes: "The introduction of beef grading in Canada, whereby the two top grades are marked for the information and protection of the public, is doing much to strengthen the demand for the better qualities of beef. This should tend to promote the raising of better grades of cattle and the finishing of animals before they are sent to market." The same authority forecasts an early return to volume exports of Canadian live cattle to Britain.

Automobile Accidents

The majority of automobile accidents are directly traceable to poor health of the drivers, according to a recent report made to the French Academy of Medicine. A commission has been appointed by the Academy to push further into the study and exert pressure on the government to include a physical examination in the requirements for a driving license.

Yolkless Eggs

Winnipeg Men Is Responsible For Strange Freak

The exact opposite of the goose of omelette fame that laid golden eggs is being enacted by a Winnipeg hen. Mrs. Russell McLeod is displaying yolkless eggs produced by this freak member of her pen. She discovered the eggs were worthless when she started out to fry them her favorite style—"sunny side up."

WORLD HAPPENINGS
BRIEFLY TOLD

British Columbia's recent lumber mission to Australia will seek cooperation of the provincial government in securing a lumber tariff preference in that dominion.

The Italian council of ministers voted an appropriation of 100,000 lire, or about \$5,230,000, to rebuild the stricken earthquake area of Middle Eastern Italy.

Mrs. Shantini Naidu, woman leader of the Indian Nationalists, is said by the Daily Herald to be willing to compromise with the government somewhat short of Mahatma Gandhi's demands for independence.

The London naval treaty passed through all its stages in the House of Lords and only needed the royal assent before becoming effective. The bill gives legal support to the pact entered into at the recent London naval conference.

The visible supply of American grain at the end of July shows the following changes in bushels: Wheat increased 14,503,000; corn decreased 278,000; oats decreased 980,000; rye increased 39,000; barley increased 276,000.

Premier Ramsay MacDonald announced in the House of Commons that the government proposed to invite the leaders of the two opposition parties to nominate a representative from both houses to participate in the round table conference on India which will be held this fall.

Great Britain's unemployment problem is nearing the 2,000,000 mark, it was announced by the Ministry of Labor. The official statement said that on July 21 the number of persons out of work was 1,972,700, an increase of 32,834 in a week and \$50,057 in a year.

Brandon police are looking for the person who passed an American one dollar bill off on a local hotel for \$20. The bill was raised from \$1 to \$20 in such masterful style that the authorities are of the opinion that the country might be flooded with the bill. It was only when the bill had received close scrutiny at the bank that the deception was caught.

Makes First Official Test

Premier Bracken Talks Over Radio From Pine Flon Flon

From the staff house of the Hudson Bay Mining and Smelting Company at Pine Flon Flon, Mr. Bracken and Bruce Bracken, his son held a combined radio and long distance telephone talk with Mrs. Bracken, Winnipeg.

The premier's conversation marked the first official test of the new radio phone system between Pine Flon Flon and the Pas and the results were entirely successful.

Interesting Experiment

During recent experiments, Marconi has recorded air messages on a photograph disc with perfect success. The experiment was made by the inventor while on his yacht lying near Genoa. The message was sent to Sydney, Australia, about 11,000 miles away. The recording was not only clear but perfect, but was re-transmitted from Sydney by wireless to the original sender.

Prefer Silent Films

Motion-picture fans of Denmark prefer the silent film and soft music to the sound film. Especially is this apparent in Copenhagen. The principal reason is apparently the linguistic difficulties, which the partial translation of texts has failed to overcome. Few Danes understand English.

Winnipeg Hydro Developments

J. W. Ranger, of the City of Winnipeg Hydro, states that due to new developments and technical improvements that make it possible to transmit heavier voltages than in the past, it is now possible for Winnipeg to bring power from the Nelson River.

Chinese Showaways

Party Of Six Have Narrow Escape From Death When Vessel Is Fumigated

Efforts of six Chinese showaways to enter Canada aboard the British freighter S.S. Benary, failed when they reached New Westminster recently.

The sextette were fortunate to be alive after more than two weeks in a coal bunker aboard the ship and especially after fumigation operations took place. By some chance deadly cyanide gas failed to reach the hold where the Chinese were hiding.

Officers who entered the hold declared it was a marvel they survived the ocean trip as it was probably worse than the famous "Black Hole of Calcutta." It was believed that Chinese members of the ship's crew kept their compatriots provided with food on the long trip.

The ship left Yokohama on July 4. After being arrested they were turned over to the Vancouver immigration authorities to await deportation.

Amended Grain Act

New Regulations Come Into Force On September First

By a proclamation in the current issue of the "Canada Gazette," the grain act as amended shall come into force on September 1.

The act was re-written following recommendations made by the agricultural committee of the House of Commons, and was passed last session. A lengthy investigation of the operation of the act was conducted during the last two sessions of parliament and numerous amendments were approved. Several grades were given new definitions, clauses were inserted to prevent mixing of grades and the whole of the act's operations was reviewed.

OUT DOOR LIFE CALLS
FOR NOURISHING FOOD

By AMY SMITH
Well Known Domestic Science Author

Off for a day or a month—in the car or hiking, boating, fishing—after a few hours you will find FOOD looms up as the biggest thing in the world. Country, you see, is a hungry place!

Of course milk, and plenty of it, is essential for nourishing, appetizing food—and for campers or picnickers. Borden's Sterilized Evaporated Milk is by far the best choice, providing plenty of pure, rich milk, regardless of weather conditions, rough journeys, out-of-the-way camping places—and lack of ice.

Because Evaporated Milk has had half the water removed, you can rely on its extra richness, which can be utilized to take the place of eggs or butter in many kinds of cooking. For instance, an old recipe, famous for its fish fries, told me that in camp he always dipped the fish in milk before the final cooking with corn meal.

When Evaporated Milk is used instead of milk in any recipe it should be diluted with an equal amount of water. Remember this simple rule, and you will find it makes a real difference to "cream" your coffee, use it undiluted.

Speaking of Fish—

A "dry pot" is used by Canadian guides for cooking large quantities of fish. The piece of fish in Evaporated Milk and then in corn meal is dropped into the pot and fry until brown. And, by the way, take this tip: A very little of the right kind in the right place will make a difference in the quality of the food.

A savory fish chowder is always a welcome dish in camp. It's easily made with Evaporated Milk.

Fish Chowder

Cut the fish in chunks and remove all bones as possible. Cover the bottom of an iron pot with slices of hard tack biscuit, and season each layer. Remove part of the pork fat, add a layer of Evaporated Milk, some sliced onions and a layer of fish. Cover with pieces of hard tack biscuit, and season each layer. Repeat the layers until the milk is used up. Add one and one-half hours, or until the milk is used up. Add one and one-half hours, or until the milk is used up.

Hot and breads to eat with the bacon, fish, or pork and gravy, are served success after a day in the oven, or to begin the day.

Cornmeal Kneadings

1 cup cornmeal

1 cup flour

1 cup sugar

1 cup water

1 cup butter

1 cup milk

1 cup oil

1 cup salt

1 cup yeast

1 cup soda

1 cup vinegar

1 cup lemon juice

1 cup orange juice

1 cup apple juice

1 cup pear juice

1 cup plum juice

1 cup cherry juice

1 cup strawberry juice

1 cup raspberry juice

1 cup blackberry juice

1 cup blueberry juice

1 cup huckleberry juice

1 cup currant juice

1 cup gooseberry juice

1 cup loganberry juice

1 cup mulberry juice

1 cup raspberry juice

1 cup strawberry juice

1 cup blackberry juice

1 cup blueberry juice

1 cup huckleberry juice

1 cup currant juice

1 cup gooseberry juice

1 cup loganberry juice

1 cup mulberry juice

1 cup raspberry juice

1 cup strawberry juice

1 cup blackberry juice

1 cup blueberry juice

1 cup huckleberry juice

1 cup currant juice

1 cup gooseberry juice

1 cup loganberry juice

1 cup mulberry juice

1 cup raspberry juice

1 cup strawberry juice

1 cup blackberry juice

1 cup blueberry juice

1 cup huckleberry juice

1 cup currant juice

1 cup gooseberry juice

1 cup loganberry juice

1 cup mulberry juice

1 cup raspberry juice

1 cup strawberry juice

Golden Text: "My son, hear the instruction of thy father, and forsake not the law of thy mother."—Proverbs 1:8.

Lesson 1 Samuel 1:1-28; 2:1-11, 18; 19: 1-18.

Devotional Reading: Luke 1:46-55.

Explanations and Comments

Hannah's Prayer For a Son. Hannah's prayer for a son, which she made in the temple, is a beautiful example of prayer. It is a prayer of faith, and it is a prayer of hope.

"The Feast of Ingathering," or "Feast of Tabernacles," which was held after the grape and olive harvest.

It was customary, after a portion of the sacrificial victim was burnt at the altar, and another portion had been given to the priests, the family partook of the rest within the sanctuary precincts. But Hannah could not eat, for sad and bitter thoughts filled her mind as she contrasted her childrenless lot with that of Peninnah, whose husband she knew would be blessed with many children. After her meal was over she presented herself in the temple to pray to Jehovah.

Her prayer was accompanied by many tears, and she stood with her face towards the ark, she made her vow that if she should have a son, she would consecrate him all the days of his life to Jehovah, and she would not let him be shaved, nor let him be married, nor let him be married, nor let him be married.

The characteristic marks of the Nazirite were the refraining from wine and all intoxicating drinks, the letting the hair grow, and the avoidance of sexual intercourse.

After Hannah returned to her home in Bethlehem, when she was made happy by the coming of a son, she named him Samuel, "because I have asked him of the Lord." Hebrew scholars tell us that the word "Samuel" has no connection with the Hebrew word for "asked," and they connect the first part of the name with the Hebrew word for "name," "Shmuel," which means "I have asked of the Lord."

Hannah was Her Only Son. The Service Of Jehovah, verses 24-28. When Hannah weaned her boy, he was probably three years old, she brought him to the house of the Lord in Shiloh. She brought also a bullock, as the law required for the first-born of a male animal, a bushel of meal and a bottle of wine.

Hannah had never known to Eli the priest by recalling the time when he had seen her praying in the sanctuary, and she presented the boy for whom she had prayed.

Ontario Grain Pool

Announcement has been made by the Ontario Grain Pool that the initial payment to members is based on 60 cents per bushel for numbers two, three and four red, white or mixed wheat, and 25 cents per bushel for number two white oats and barley at milling grade.

Up to July 16, 1930, the percentage of Pool Wheat delivered to the Saskatchewan Wheat Pool and passing through Pool Country Elevators amounted to 87.12 per cent, leaving only 12.88 per cent as having gone through Live Elevators. The corresponding percentage of grain through Pool Elevators at the same date last year was 74.60 per cent.

Chefoo consular district in China has a good roads campaign.

Wheat Pool Elevators

Up to July 16, 1930, the percentage of Pool Wheat delivered to the Saskatchewan Wheat Pool and passing through Pool Country Elevators amounted to 87.12 per cent, leaving only 12.88 per cent as having gone through Live Elevators. The corresponding percentage of grain through Pool Elevators at the same date last year was 74.60 per cent.

Here and There

(684)

Exponents of the Royal and Ancient Game went down to defeat on the Banff Springs Hotel golf course recently when Indian cherry experts played in a nine-hole foursome between two Indian, Chief Lone Walker and Lone Eagle, and William Thompson, professional on the course, and his daughter, Peggy Dalgleish, former Alberta lady golf champion. The Indians shot their arrows from the tee while the golfers played in orthodox fashion. The archers "holed in" a four-hole lead standing on end on the cup. Up to the ninth hole the game was tied, but the Indians won the latter with one stroke.

The Plumbers Opera, opening number presented at Banff Springs Hotel by the Alfred Heather Light Opera Company, that is running a summer season at the well-known Rockies resort, proved an unqualified success, while "Tom Tug, the Young Waterman," which followed it, was an even greater hit. The season will run during July and August and a number of 18th century operas with Gilbert and Sullivan and Canadian works will be given.

Sunday, July 20, will see nearly a hundred tourists leave Montreal and Toronto on the seventh annual Across Canada tour organized by Dean Sinclair Laird, of Macdonald College, Quebec. They will travel over 6,000 miles in visiting the Pacific Coast, Vancouver Island, Rocky Mountains Parks, the Prairie Provinces and the district of outstanding beauty as well as those of industrial and historical interest in Central and Western Canada.

Automatic belt regulation has now been installed for the first time in Canada on railway passenger cars by the introduction by the Canadian Pacific Railway of their new "g" type standard sleepers, constructed at the Angus Shops, Montreal, to the design of the company's experts. Two of them are already in service on the "Trans-Canada Limited."

About Town and Country

Mrs. C. P. Synder, Mrs. J. J. Skinner, Mrs. A. Wade and Mrs. M. G. Whitlock were judges at Youngstown fair last Thursday.

Mr. and Mrs. J. Shields, Miss Bennett and Mr. G. Goodall left last Sunday for Buffalo Lake, where they will spend a short vacation.

Mrs. J. W. Robinson was a judge of school work at Chinook fair last week.

Mr. and Mrs. C. L. Dunford and family left this morning en route to Calgary where they will spend a few days.

Dr. and Mrs. McPhail and daughter Jean of Kindersley, passed through Oyen this morning en route to Nelson, B.C., where they will spend a holiday.

Mrs. T. W. Johnston and daughter Vera are the guests of Mr. and Mrs. J. C. Desso. They arrived in Oyen from Rosetown, Sask., last Friday afternoon.

Mr. Ross and son Jim of Calgary are visiting at the home of Mr. and Mrs. Hill Ross at Benton.

The district meeting of the W. I. was held in Lufkin last Monday.

A heavy rain occurred last Saturday afternoon shortly after 4 o'clock for a total precipitation of .39 inch. Traces of hail were in evidence during the first few minutes of the downpour but little or no damage resulted as hailstones came down straight and were small and soft.

Dr. and Mrs. W. D. McPhail and daughter Jean of Kindersley, were Oyen visitors last Sunday.

Mr. A. O. MacArthur, Dr. S. B. McGregor, Mr. Angus Blue, Mr. M. G. Whitlock and Mr. Arthur Johnson, were visitors at the Ribstone oil field last Sunday.

Mr. and Mrs. E. B. Brundage and family who arrived in Oyen last Thursday are the guests of Mr. and Mrs. F. E. Neid.

A hail storm of considerable severity damaged standing crops in the vicinity of Sounding Creek last Saturday, several farmers suffering one hundred per cent loss. Crops some miles north of Chinook, Cereal, Lentils and Clover were also hit. Crop damage south of Sibbald is also reported.

The United Grain Growers elevator, which has been closed for three months, was re-opened August 1, with Mr. F. E. Neid again in charge.

The government maintenance outfit at work on the main highway is now in the vicinity of Sibbald.

Miss Alma Andrew who has been visiting her sister, Mrs. C. G. Peterson, returned to her home in Kuper, Sask., last Saturday.

Mr. and Mrs. H. W. Johnston and daughter Hazel of Calgary leave the weekend guests of Mr. and Mrs. J. J. Skinner.

Mr. and Mrs. David Fawcett of Penat, Sask., were visitors at the home of Mr. and Mrs. C. G. Peterson last week.

Mr. and Mrs. E. N. Charbonneau, formerly of Montreal, were Oyen visitors last Thursday evening. They left the following morning for Calgary where they will make their home.

Margaret England, Minetta and Lucille Charbonneau are spending a short holiday in Oyen.

Mr. and Mrs. W. M. Sanders and family of High River spent a short vacation visiting at the home of Mr. W. Sanders of Lufkin last week.

New Championship Golf Course

George S. Lyon, Canada's Grand Old Man of Golf, splits the fairway with the first ball driven from No. 1 tee of the Royal York Golf course recently when this new championship course, built by the Canadian Pacific Railway for the benefit of guests of Canada's premier hotel, was formally opened in the presence of Their Excellencies Lord and Lady Villington. This 18-hole course, claimed by players to be one of the best on the continent, has a par of 72 with a length of 6,510 yards. All Toronto golf clubs were represented at the opening and prominent golfers of the Dominion came together here for the occasion. This course has been selected as the scene of the annual interprovincial team match on August 2, and many tournaments in connection with conventions, including the monster one of the Shrines, will be staged there. Lay-out shows the \$100,000 Club-house of the course with a view of the Royal York Hotel.
